

MM-500 Material Validation

We, Multi Mix Company, hereby guarantee the safety, compliance, and eco-friendliness of our additive mixture product with the following characteristics:

1. **Non-Toxicity:** MM-500 has undergone rigorous testing to ensure that it does not pose any toxic hazards to human health or the environment. It is free from substances known to be harmful or toxic under normal conditions of use. Our supply chain of raw materials has proven to be non-toxic in testing and during the production process. **NON-PETROLEUM PRODUCTS HAVE BEEN USED TO MANUFACTURE MM-500.**
2. **Non-Flammability:** MM-500 has been certified as non-flammable, meaning it does not easily ignite or contribute to the spread of fire. It has been tested and found to meet the standards for non-flammability. See section 3 -Physical Data of MSDS.
3. **Non-Combustibility:** MM-500 has been verified to be non-combustible, meaning it does not undergo combustion or burn when exposed to fire or high temperatures. It has been tested and found to be stable under conditions that would typically cause combustion.
4. **Non-Hazardous:** MM-500 has been determined to be non-hazardous according to established criteria for hazardous substances. It does not contain ingredients or components that are classified as hazardous under applicable regulations. Our supply chain of raw materials has proven to be non-hazardous in testing and during the production process.

Biodegradability: MM-500 is formulated with biodegradable ingredients, ensuring that it breaks down naturally over time into harmless substances when disposed of properly. We are committed to reducing environmental impact and promoting the sustainability of our products through biodegradable formulations.

Eco-Friendly: At Multi Mix Company, we are committed to sustainability and environmental responsibility. Our additive mixture product is formulated with eco-friendly ingredients and manufacturing processes aimed at minimizing environmental impact. We strive to reduce waste, conserve resources, and promote eco-conscious practices throughout the product lifecycle.

We assure our customers that our additive mixture product is manufactured and formulated in accordance with strict quality control measures to ensure safety, reliability, and compliance with relevant safety standards and regulations.

Sustainability and Low Carbon Footprint Statement: At Multi Mix Company, sustainability is at the core of our values. Our additive mixture product is manufactured using processes that prioritize sustainability and minimize environmental impact. Our manufacturing facilities adhere to strict sustainability standards, ensuring a low carbon footprint and impact to the environment.

Additionally, our product is designed for maximum efficiency and minimal waste throughout its lifecycle. From manufacturing to post-usage for all intended applications, we strive to minimize environmental impact and promote a sustainable future for generations to come.

We assure our customers that our additive mixture product is manufactured and formulated in accordance with strict quality control measures to ensure safety, reliability, and compliance with relevant safety standards and regulations.

For further information regarding the safety, eco-friendliness, biodegradability, and handling of our additive mixture product, please refer to the accompanying Material Safety Data Sheet (MSDS) and product documentation.
